FAQ'S

Do I need to be fit to sail one of these?

No, anybody can handle a catamaran - unlike monohulls, they're very forgiving and easy to handle...

What if it tips over?

That's very hard to do - just let the sail tension off - the boat simply sits there (cats don't 'roll over' like monohulls) - but if you do capsize, just learn the simple technique for righting it - it's not that hard to do...

Is it fun & easy to learn to sail?

With a catamaran - yes!! **Is it heavy to lift?** No - you should never have to lift the boat far - or just buy beach rollers (that strap to your trailer) to get the boat easily down the beach...

Do I need a license? Only to have fun...

Is it fast to rig and get sailing? About 1/2 an hour...

Can I rig it by myself? Yes - it's easy...

How many can sail at once? 1 adult • adult & 1 or 2 small kids or light-weight 2-up adult crew...

What maintenance is involved?

Just wash off with fresh water after sailing & occasionally lubricate moving parts - that's it!

What are the on-going costs?

None - apart from insurance - and once you have your boat, the wind is free, and of course - no petrol required...

The Windrush 14 is Australia's most popular 'one-design' catamaran. It's equally at home 'off-the-beach' or lake / open water. Its 'hassle-free' design is simple and strong - and will 'grow' with you - from basic 1 sail configuration to jib and trapeze / spinnaker - It can be sailed single handed, or with a light-weight doubles combination of 100 - 120 kg.
